

PELANGI

DISPOSABLE BATTERY

PA288 & PA540

Disposable 18 volt battery ideal for powering aids on a temporary basis or where vandalism or bird droppings prevent the use of solar power.

Designed as a complete battery without the need to inter-connect existing cells into a pack to improve reliability.

- Dry le clanché type battery does not require the addition of water or ventilation.
- Specifically designed for use in sealed buoy battery compartments with no air flow such as ice buoys which become totally submerged below the ice cap in winter months.
- Different sized terminals prevents reverse polarity connections (M9 positive, M6 negative).
- The PA288 or PA540 can be interconnected to increase capacity.
- Robust plastic waterproof container.
- Sturdy fold-away handle for lifting in and out of buoy compartments. Especially suited to deep tail tube applications.
- Shelf life of 1 year at full capacity and then only 10% reduction per annum thereafter.
- 18 volt battery for use with flashers that have lamp regulation fitted to enable maximum power to be utilised from the battery.
- 2 and 3 year unattended periods can be achieved on light duties between battery changes.
- Waterproof replaceable 5 amp fuse.

	PA288	PA540
Diameter	229mm	229mm
Overall height	804mm	804mm
Weight	34kgs (+/-2kgs)	34kgs (+/-2kgs)
Voltage	18 volts	18 volts
Capacity	288AH	540AH
Max peak load	50 watts	50 watts
